

VOICE COMMANDS
"TURN RIGHT
ON MAPLE ST."

NET WEIGHT 40 TONS.

NET WEIGHT 11 OUNCES.

The Manhattan Yellow Pages alone weighs over six pounds. **Imagine** having the option to add the yellow pages for Boston, LA, Chicago, Atlanta and every other city and town in America to the scale. Pretty heavy stuff huh? Not if you have the new **World Navigator GPS from TeleType**. Only World Navigator enables you to have every pizza, drugstore, hotel, car rental, taxi, doctors office – every listing from every yellow pages directory in America – **put neatly into a compact 11 ounce GPS unit**. But the fun doesn't stop there. World Navigator also includes:

WorldNavigator™

- Magnified screen imaging for ease and safety
- Voice recognition software
- Live real-time traffic updates
- Street level mapping for U.S. or European cities and towns
- Live real-time weather updates
- Marine/aviation applications

Now that World Navigator offers you the option to add as many Yellow Page listings as you like, instead of letting your fingers do the walking, all you need to do is a little talking. For more information or to order TeleType World Navigator visit www.teletype.com.
