

# TELETYPE GPS PDA POWERED VENT CLIP

Product #2091/#2093

The Vent Clip provides a mechanism for easily mounting and viewing the PDA in your vehicle.

*Fig.1 Rotate and insert to attach.*

*Fig.2 Adjust disc to tighten.*

## ATTACH THE VENT CLIP TO THE AIR CONDITIONER VENT

1. Manually spread the hooks to widest possible position.
2. Insert the clip onto the grill of the air conditioning vent. You will need to rotate the entire vent clip slightly to obtain the best position to insert and attach to the vent. See *Fig. 1*.
3. Adjust the disc closest to the vent to properly secure the clip to the vent. See *Fig. 2*.
4. Peel off the adhesive from the smaller triangle (the larger triangle has already been attached to the clip) and attach the triangle to your PDA (in the case of the iPAQ, attach to the Compaq expansion jacket). Slide the PDA onto the vent clip. See *Fig. 3*.
5. Adjust the viewing angle for the PDA by rotating the disc closest to the PDA.
6. Optional - attach 12v power source to the PDA.

*Fig.3 Slide in, adjust viewing angle.*

*Fig.4 Installation finished.*
